

## JACE'S STORY

Jace was diagnosed with Kawasaki disease in January 2016, when he was just 4 months old. Jace became sick with what seemed like a cold, then a more severe respiratory virus. We took him to the doctor two times, in which blood work and chest x-rays were performed. The doctors could not find any significant problems with our baby, they just kept telling us he had a virus.

After two more days of an uncontrollable high fever and a sicker and more lethargic looking Jace, we went back to the pediatrician's office. A group of doctors asked us lots of questions and sent us home. About an hour later, they called and said we needed to take Jace to Children's Hospital, where the infectious disease team would be waiting for us.

Scared and confused, we headed there having no idea what the next 48 hours would hold for us. After a long night, Jace was admitted to the hospital with a diagnosis of Kawasaki Disease. The next morning (day 4 of Jace being sick), we decided to move forward with the IVIG infusion to stop the inflammation in his tiny body. After a 12-hour treatment, our baby was looking more like himself.

He has had four echocardiograms over the past 2 years, and his heart and arteries look normal and healthy. Because of his early diagnosis and treatment, Jace's heart was saved.

Awareness and early diagnosis are essential to saving the hearts of children who are diagnosed with this rare disease. Your sponsorship will help fund awareness and research of Kawasaki disease.

## WHY WE SPONSOR

Winston Churchill once said, "We make a living by what we get, but we make a life by what we give." Delta Disaster Services of Northern Colorado helps sponsor the Kickin' Kawasaki 5K because we believe in giving back to the very community which supports our business, the livelihoods of our staff and to help raise awareness for Kawasaki Disease.

*Delta Disaster Services of Northern Colorado*

The number one reason I sponsor is because I firmly believe in supporting the people that support me and my business. You do that and I am grateful!! Second, my nephew was diagnosed with Kawasaki Disease when he was a baby. We know that we were just fortunate that his was diagnosed sooner and is blessed to have had no lingering problems.
