

KENNEDY'S STORY

In August 2019, we noticed our daughter's eyes were red and didn't think anything of it. The next day she started running fevers. At the age of 11 weeks, we were recommended to go to the emergency room and sent home and told to "ride it out". A couple days later, we were back at the pediatricians office. Our child had continually ran fevers, was not eating as well, not sleeping through the night, and much more fussy than normal. We were sent to the hospital for labs, and then sent to the ER again and once again sent home. After 13 days of continuous fevers, sleepless nights, and almost continuous crying, we were at our wits end as parents and once again went to the ER. We were admitted with a "fever of unknown origin". She was diagnosed with Kawasaki Disease after an ECHO showed a giant aneurysm and transferred to Children's Hospital for IVIG treatment. We later found out that she had a total of 5 aneurysms which could have been prevented with earlier diagnosis. We are running to bring awareness to Kawasaki Disease because we were diagnosed outside the 10-day treatment window.

Since early diagnosis is essential to saving the hearts of children who are diagnosed with this rare disease, awareness by both parents and healthcare professionals is essential. Your sponsorship will go far to help spread awareness and fund research that will improve the heart health of kids affected by Kawasaki Disease.

WHY WE SPONSOR

Winston Churchill once said, "We make a living by what we get, but we make a life by what we give." Delta Disaster Services of Northern Colorado helps sponsor the Kickin' Kawasaki 5K because we believe in giving back to the very community which supports our business, the livelihoods of our staff and to help raise awareness for Kawasaki Disease.

Delta Disaster Services of Northern Colorado

The number one reason I sponsor is because I firmly believe in supporting the people that support me and my business. You do that and I am grateful!! Second, my nephew was diagnosed with Kawasaki Disease when he was a baby. We know that we were just fortunate that his was diagnosed sooner and is blessed to have had no lingering problems.
